

Time
COMPOSER

THE UNIVERSE

« In the year 2270, following a musical experience, Time Composer discovered time travel. Thanks to the multicolored rays of his Piano-Laser, he teleports to the rhythm of his melodies through time and the various civilizations of History... »

A composer with a strong sense of melody, Time Composer shares his emotions between his piano and his retro-futuristic universe on the Laser Harp. His electro style blends perfectly with the vintage romance of his piano compositions. The artist is also a true showman offering his audience impressive shows with multicolored laser beams vibrating to the rhythms of his melodies.

Time Composer embodies a science-fiction musician living in 2270 in a destroyed world. In order to discover the beauties of a vanished world, he uncovers the secret of the gates of time and sets off on a journey as luminous as it is melodious, through history and the centuries.

THE INSTRUMENT

Popularized by Jean-Michel Jarre during his concerts, the Laser Harp, invented by Bernard Szajner in 1980, is used by about ten people around the world. It is the only musical instrument on which you can trigger notes with your hands by touching rays of light.

The Piano-Laser is an instrument invented by Time Composer and specially manufactured by engineers Franck Morisseau, Laurent Berth, Laurent Maillé and Franck Labourel. This unique copy in the world perfectly matches the artist's prerogatives in order to offer his audience impressive and magical concerts.

THE ARTISTIC ENVIRONMENT

In 2010, during a concert at "Le Mas" in Grand Paris, Time Composer performed in duo with Erhu's Chinese master, Guo Gan. An exceptionally successful musical fusion between an age-old violin and a futuristic Laser Harp. This perfect sound symbiosis immediately plunged us into a journey into the heart of the Forbidden City.

Time Composer is the official composer of the French National Olympic and Sports Committee (CNOSF) for the anthem "Sentez-Vous Sport". At the request of the CNOSF, he performed the opening concerts of the Club France in Rio de Janeiro for the 2016 Olympic Games, accompanied by the saxophonist Manu Dibango.

In 2015, Time Composer created a unique show for the launch of the new Porsche 911 in Leipzig, Germany.

Françoise Cadol, Angelina Jolie's dubbing voice in France, is now an integral part of the artist's shows. Here she embodies the official voice of "Nano", the artificial intelligence of Time Composer.

THE DISCOGRAPHY

2008 : TELEPORTATION

The artist's debut album with 13 tracks in a new-age style mixing the most dynamic rhythms with softly melancholic melodies.

2013 : JOURNEY TO THE FORBIDDEN CITY

Duo album with Erhu's Chinese master, Guo Gan. An immersive album of 10 tracks that plunges the audience into the world of the Forbidden City and its secret gardens. An encounter between futuristic notes and the Chinese ancestral string instrument, the Erhu.

2017 : FIRST TIME

This 4-track EP launches the artistic concept of Time Composer. It unveils pure, inspiring and rhythmic music that draws everyone into a unique musical experience. Mastered by Antoine Chabert, this album is also composed with the sound creations of Sound Designer Kurt Ader.

2018 : TIME JUMP

At the crossroads between the worlds of Daft Punk and Kavinsky, this single is a continuation of the EP First Time, and tells the story of Time Composer's first time jumps.

2019 : MUSIC BOX

A waltz born from the excitement of a fairy tale! A wonderful blend of the artist's reverie at the piano accompanied by the magic of an orchestra. This Single was recorded in the famous Studios Ferber in Paris with 70 musicians of the symphonic orchestra Ensemble Instrumental Donna Musica and specially arranged by the conductor Eric Darrigrand

2020 : CAROUSEL OF LIFE

The artist's first acoustic album, which transports you with its 7 tracks into a world full of dreams and passions. Entirely composed and performed on the piano, Time Composer lets his emotions speak for themselves here...
