In the year 2270, following a musical experience, Time Composer discovered time travel. Thanks to the multicolored rays of his Laser Harp, he teleports himself to the rhythm of his melodies through time and the various civilizations of History...

A man with short grey hair, wearing a blue long-sleeved shirt, is shown from the side, looking down at a piece of sheet music he is holding in his left hand. He is seated at a piano, with his right hand on the keys. The scene is lit with warm, golden light, creating a dramatic atmosphere. The background shows the interior of a piano with various mechanical parts and strings.

*“Time Composer did a show with his Laser Harp for the Club France opening during the Rio Olympics. A show with stunning effects, where the future of sound seems both harmonious and spectacular!”
(Le Républicain Lorrain)*
